Full-Stack Developer

"Everyone must get a chance to show their talent and skills."

Project

Back-End Project

E-Hospital Websites

The E-Hospital Management System is an innovative web-based platform developed using Java technology, aimed at revolutionizing the traditional healthcare system by providing a seamless and efficient way to manage hospital operations, patient care, and administrative tasks. It serves as a centralized hub for patients, doctors, nurses, administrative staff, and other stakeholders involved in the healthcare ecosystem.

Technology Used : Java EE, Spring Framework, HTML5, CSS, Java Script, Hibernate, Apache Tomcat, Swagger UI.

Back-End Project

Business management System Websites

Our Java-powered Business Management System website offers a comprehensive solution for businesses to streamline operations, enhance productivity, and drive growth. With its versatile features, robust technology stack, and user-friendly interface, it empowers businesses to optimize efficiency and achieve their goals effectively in today's competitive landscape.

Technology Used : Java EE, Spring Framework, HTML5, CSS, Java Script, Hibernate, Apache Tomcat, Swagger UI.

Front-End Project

E-Commerce Websites

Our React-powered E-Commerce Shopping Website is a cutting-edge platform designed to deliver an immersive and seamless shopping experience to users. Leveraging the power of React, this website offers a highly responsive and interactive interface, ensuring a smooth and engaging shopping journey for customers.

Technology Used : React, Redux, React-Router, jQuery, Owl-Carousel, HTML, CSS/SCSS, JavaScript, Bootstrap5. ([Live Preview](#) / [Live Preview](#)).
